

Eye Care Recovery and Transformation Commissioning Workstream

John Ashcroft CEO

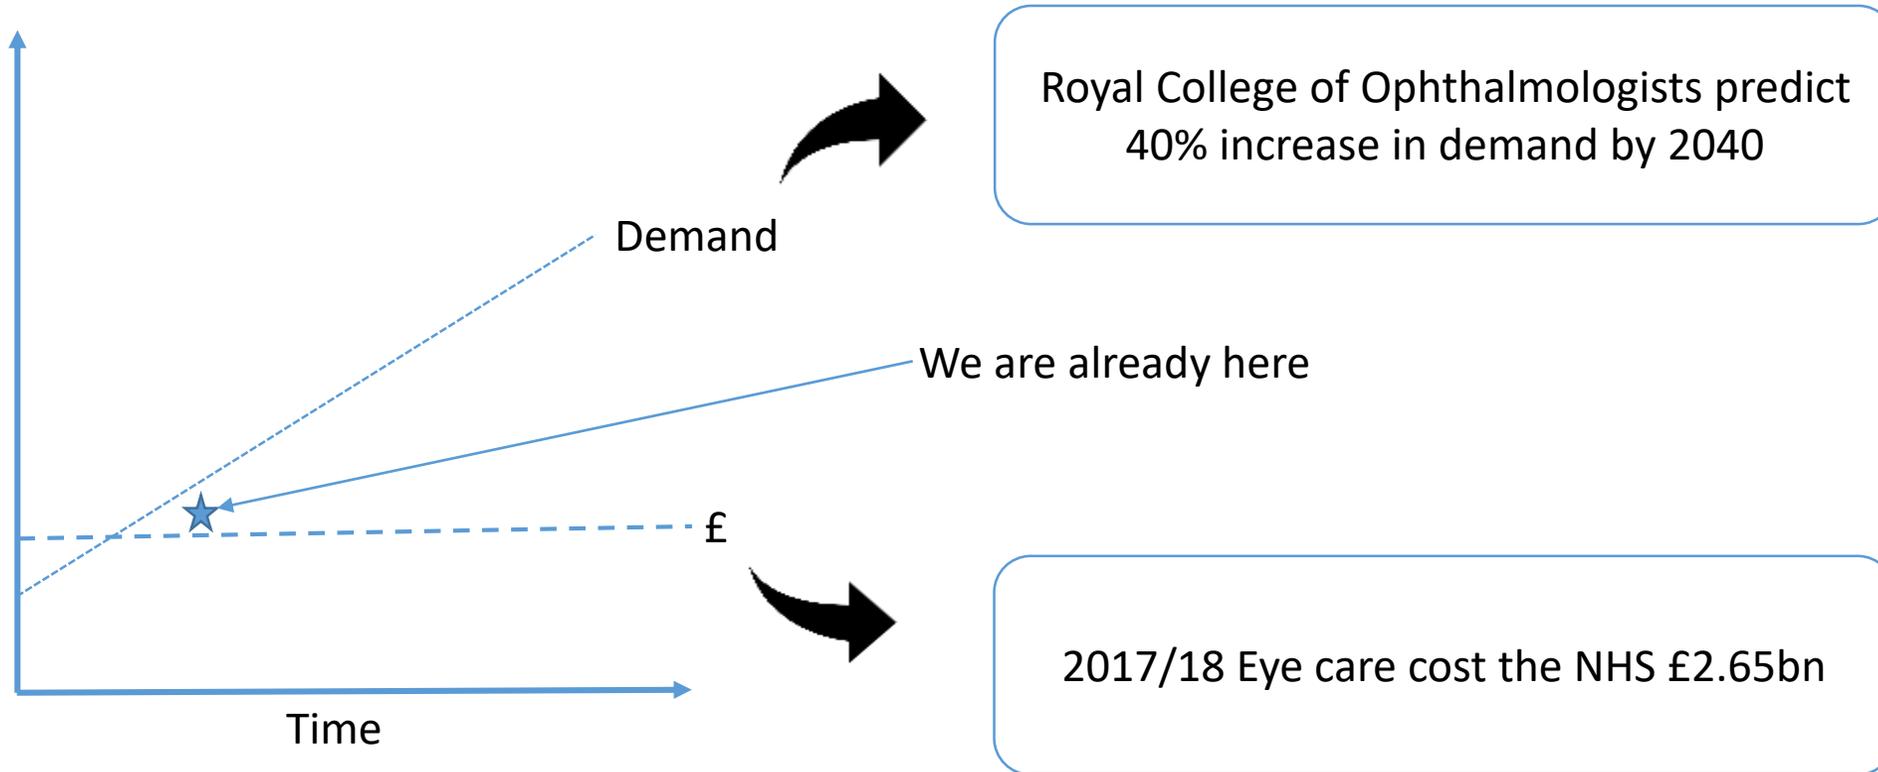

Manchester Royal Eye Hospital, UKOA Board, NECRT Commissioning workstream co-lead

James Lorigan

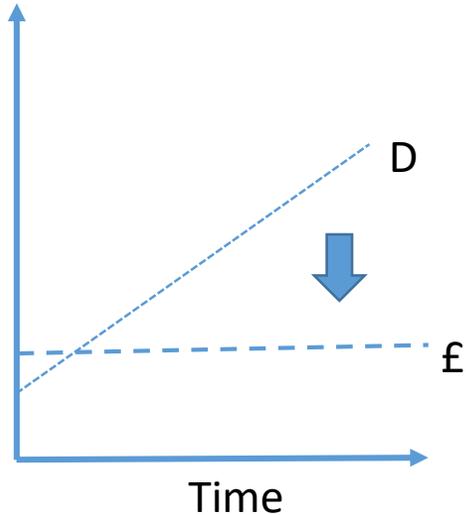

NHSEI Pricing Regulation Lead, NECRT Commissioning workstream lead

UKOA Meeting 14th April 2021

Commissioning - What's the problem?

Narrowing the gap between demand and resource

Use less resources to do the same thing

Same or better results using a different approach

Reduce demand for the intervention

Stop doing something

Two challenges

1. Get demand and resources back into balance
2. At least 2% productivity growth every year to maintain balance

What do we want to achieve

Move eye care commissioning onto a sustainable footing by making sure that

-  Integrated Care Systems know how much they spend on eye care, what they spend it on and what they get for it and where the gaps are
-  Integrated Care Systems have the tools, skills, networks and shared learning to invest money and resources to get the best eye care services for their population in the long term
-  The right services are commissioned at the right level in the right place with meaningful input from the people that use the service and those that work in it.

What will the commissioning workstream do?

Strategic

- Providing commissioning support across the Eye Care programme
- Mapping spend, need and opportunity by ICS
- Supporting ICS's to develop a coherent 3-5 year investment strategy

Tactical

- Working with Eye Care workstreams to develop commissioning solutions
- Capturing and sharing good/ new practice
- Supporting the development of commissioning skills, tools and understanding

Operational

- Supporting Eye Care workstream leads with implementation and evaluation
- Working with the pilot sites to develop commissioning and contracting models
- Developing a community of practice around eye care commissioning

How will we do this?

0-3 months	3-6 months	6-12 months
Baseline of current eye care spend, activity and value for three ICSs	Document variation in commissioning value/ approach for three ICSs including inequalities in provision	Map out the size of the opportunity at ICS level to develop a coherent 3-5 year investment strategy
Document existing commissioning mechanisms for: <ul style="list-style-type: none"> • Digital eye care hubs • Home care monitoring • Primary care optimisation 	Develop potential contracting mechanisms for: <ul style="list-style-type: none"> • Digital eye care hubs • Home care monitoring • Primary care optimisation 	Recommended models and recommendations for the 22/23 contracting round
Baseline eye care commissioners expectations and needs	Finalise and launch eye care commissioning development strategy	Develop tools, skills and networks to support the commissioning of eye care services
	Launch pilots in three ICSs	Evaluation of pilots
